Vineeth S S

Full-Stack Developer

vineethsuresh2004@gmail.com • LinkedIn: vineethss • GitHub: Vineeth-SS • its-vineeth.netlify.app • +91-7975014521

Profile

Final-year B.E. Computer Science student and Full-Stack Developer with hands-on experience building product-oriented web applications using Next.js, React.js, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, Docker, and REST APIs. Experienced in frontend development, backend engineering, API integration, database design, and containerized environments. Seeking Full-Stack Developer or Software Engineer roles.

Education

- **B.E. in Computer Science and Engineering**, Bapuji Institute of Engineering and Technology (2022–2026)
  CGPA: 8.4
- **Higher Secondary Education**, Sir M V PU College (2020–2022)

Skills

Programming Languages: C, Go, Java, JavaScript, Python, SQL, TypeScript
Frontend: CSS3, HTML5, Next.js, React.js, Tailwind CSS
Backend: Express.js, Node.js, REST APIs, WebSockets
Databases: ConvexDB, MongoDB, Mongoose, PostgreSQL,MySQL
DevOps & Cloud: Docker, Docker Compose, Docker Swarm, Kubernetes
Core Computer Science: Agile/Scrum, API Integration, Database Design, Data Structures and Algorithms, Object-Oriented Programming, Software Development, Data Modeling

Certifications

- Networking Basics – Cisco (2025)
- DevOps with Azure – Infosys (2025)
- Hands-on Supervised Machine Learning with Python – Infosys (2025)
- Cloud Native Development with Kubernetes – Infosys (2025)
- Cloud Native CI/CD – Infosys (2025)
- Introduction to MongoDB – MongoDB (2025)
- React Web Developer Certification – Infosys (2025)

Projects

Forkify – Recipe App

- Built with Parcel bundler, integrated external recipe API, used core-js for polyfilling and enhanced functionality.
- Tested and validated application performance and usability with 50+ users, ensuring reliability and smooth user interaction.

NFT E–Store

- Engineered a visually appealing NFT shopping UI that integrated 5 interactive JavaScript features
- The fully responsive design improved average session duration by 25%.

Product View – Merchandise Display App

- Developed an interactive shoe display with cart functionality, responsive sliders, and seamless checkout navigation.
- Engaged over 100+ users.

Portrait E–Store – Art Discovery Platform

- Features a responsive art discovery platform with light/dark mode, interactive like/share features, and optimized

Experience

LogicBrackets

Software Developer Intern | Bangalore

- Led key parts of full-stack development of Browser Agent POC, delivering 25+ API-driven workflows using Next.js, React.js, Node.js, Express.js, and PostgreSQL for recording, orchestration, and execution.
- Designed a scalable execution system with Docker, supporting 2 isolated runtime environments, 3 browser engines, and 6+ action types, enabling reusable, data-driven multi-environment workflows.

Achievements

Showcased innovative Smart Mirror and Voice-to-Code concepts at **Rakuten (Mar 2024)**; won 1st place among 100+ participants in **ENCRYPT-2024 (Jan 2024)** and secured 2nd place at **Manthan Hackathon (Apr 2023)** by building a high-performance web application under tight deadlines.
